- Problem-solving
- Communication
- Team collaboration
- Time management
- Responsibility & adaptability

## Language

Khmer

English

## About me

I'm a Web Developer based in Phnom Penh with a strong focus on frontend development. I build responsive, user-friendly web interfaces using HTML, CSS, Tailwind CSS, JavaScript, TypeScript, Angular, and Vue.js. I also work with APIs and backend systems to deliver complete web solutions, and I enjoy turning designs into clean, maintainable code.

## Working Experiences

### Web Developer

Polygram Solution Co., Ltd

May 2024 - Present

- Develop and maintain web applications with a strong focus on frontend development using Angular.
- Convert Figma designs into responsive and user-friendly interfaces.
- Integrate frontend features with REST APIs and backend services.
- Build reusable components and maintain consistent UI patterns.
- Debug UI issues and optimize performance to improve user experience.

### Web Developer

INTECHDEV Co., Ltd.

June 2022 - May 2024

- Built web applications with a strong focus on frontend development using Angular.
- Implemented responsive layouts and interactive features based on design requirements.
- Integrated frontend components with backend APIs for data handling.
- Fixed bugs and optimized performance to ensure smooth and reliable applications.

### Web Developer

POSCAR Digital Co., Ltd.

Jan 2022 - April 2022

- Worked on web projects mainly focusing on frontend development using Vue.js.
- Assisted with backend development using PHP (Laravel) when required.
- Integrated frontend interfaces with backend APIs and database-driven features.
- Fixed issues, optimized performance, and supported project documentation.
