English

About me

I'm a Frontend Developer based in Phnom Penh who loves creating clean, responsive, and easy-to-use websites. I work with HTML, CSS, Tailwind CSS, JavaScript, TypeScript, and frameworks like Angular and Vue.js. I enjoy turning Figma designs into real, functional web pages that look great on any device.

Working Experiences

Frontend Developer
Polygram Solution Co., Ltd
May 2024 - Present

- Developed and maintained high-performance Angular web applications for government and enterprise systems integrated with REST APIs.
- Collaborated with UX/UI designers to convert Figma prototypes into pixel-perfect, responsive UIs.
- Built reusable UI components, improving consistency and reducing development time.
- Optimized performance and resolved critical issues to enhance system stability and user experience.

Frontend Developer
IntechDev Co., Ltd.
June 2022 - May 2024

- Developed government and enterprise web applications with Angular and REST APIs,
- Converted Figma designs into responsive, user-friendly interfaces while ensuring design consistency.
- Fixed bugs and optimized performance to improve application speed and usability.

Web Developer
POSCAR Digital Co., Ltd.
Jan 2022 - April 2022

- Assisted in web development using PHP (Laravel) and Vue.js for various projects.
- Designed feature mockups, analyzed databases, and reviewed functional documents to support development.
- Integrated websites with backend services and APIs to enhance functionality.
- Fixed bugs, optimized performance, and prepared documentation to support project delivery.
